SUMMARY

I am an aspiring software developer with strong interests in mobile and web development. I have hands-on experience building applications using Flutter, React, and Laravel, with both SQLite and MySQL databases. I enjoy creating full-stack solutions such as dashboards, APIs, and course management systems. I continuously improve my technical skills through Udemy courses and self-directed learning. Dedicated and detail-oriented, I aim to become a proficient full-stack or mobile developer capable of building scalable and user-friendly applications.

PROFESSIONAL EXPERIENCE

Course Management Dashboard — Institute of Digital Governance (IDG)
6-month Internship | 2025

DEC-2025 - Present

- Built a web-based Course Management Dashboard to manage courses, users, and grades, integrated with a Laravel API.
- Designed a responsive and modern front-end using and Bootstrap 5 for full-view layouts.
- Developed RESTful APIs in Laravel to fetch, manage, and synchronize data with Moodle for exams and course participation tracking.
- Implemented search, filter, pagination, and year management functionalities for efficient data handling.
- Enabled creation of courses, management of participants, and import/export to Moodle system.
- Added general access links and a registration form for users to enroll in courses or exams.
- Focused on full-stack development, ensuring smooth interaction between front-end, back-end, and external systems (Moodle).

PROJECT

DEC-2024

Flutter_Quizapp

- Developed code to generate questions dynamically.
- Designed and implemented the UI.

Flutter_login_Expenses

- Built a backend authentication system using Node.js and MySQL.
- Designed and developed a responsive Flutter UI.

SKILLS		
HIML	BootStrap	Flutter
CSS	Dart	UX/UI Desgin
Laravel	React.js	MY SQL

EDUCATION

Norton University – Year 4 of Study (Expected Graduation: 2026)

- Focused on foundational and advanced concepts of software development, including mobile app development, algorithms, and system design.
- Actively developing skills in Flutter, Kotlin, React.js, Laravel, and full-stack development.
- Participated in practical projects and hands-on exercises to strengthen software engineering and problem-solving abilities.
